## MCH

### Continuous hinge enclosure

The continuous stainless steel piano style hinge built into the frame of the enclosure. This feature eliminates pry points and allows the door to open 180° for full access. The top of the box shields the lid for additional protection. When a larger size enclosure is required, the MCH is an ideal solution. The continuous stainless steel piano hinge easily supports the weight of a larger door. The MCH design can be modified for weather tightness for active electronics. Plan now for the future with the MCH.

STANDARD DIMENSIONS			
Width	Height	Depth	Part No.
12"	12"	8"	MCH12128
12"	15"	8"	MCH12158

**CUSTOM SIZES ARE AVAILABLE**

### MBE • Backless, expandable option to MCH enclosure

This innovative NEW backless and expandable security enclosure provides an unprecedented level of flexibility for the changing needs of communications network customers. The unique design of the Moore MBE allows you to upgrade or expand the size and security level of your existing enclosure **without ever interrupting service to your customers**. Simply start by securing your mounting plate

to the wall of your building and add on as much or as little as you choose. Upgrading size, upgrading security or replacing damaged enclosures has never been easier. The MBE feature can be applied to any of our existing MDU enclosures with the exception of the FIP boxes. Consult a Moore representative to determine the best MBE security enclosure for your project.

**Example:** MCHBE backless expandable enclosure with sliding tap rack and Riser Guard knockouts.
