## MSD

### "Box in a Box" with solid back

All Moore's double boxes are designed to give your system maximum protection against vandalism. These MDU enclosures feature a 14 or 16 gauge lid with continuous stainless steel welds. Tight lid tolerances, coupled with high security locks housed in a heavy duty shroud, provide a tamper resistant apartment lock box which deters theft and destruction. The interior box offers a solid back with access slots and tie lances to improve organization. Two locks are suggested for boxes 18" wide or wider and 24" high or higher.

STANDARD DIMENSIONS			
Width	Height	Depth	Part No.
10"	10"	8"	MSD10108
12"	12"	8"	MSD12128
12"	15"	8"	MSD12158

**CUSTOM SIZES ARE AVAILABLE**

### MBE • Backless, expandable option to MSD enclosure

This innovative NEW backless and expandable security enclosure provides an unprecedented level of flexibility for the changing needs of communications network customers. The unique design of the Moore MBE allows you to upgrade or expand the size and security level of your existing enclosure **without ever interrupting service to your customers**. Simply start by securing your mounting plate

to the wall of your building and add on as much or as little as you choose. Upgrading size, upgrading security or replacing damaged enclosures has never been easier. The MBE feature can be applied to any of our existing MDU enclosures with the exception of the FIP boxes. Consult a Moore representative to determine the best MBE security enclosure for your project.

**Example:** MSDBE backless expandable enclosure with sliding tap rack and Riser Guard knockouts.
